

Sidewalk Notice

In light of the recent confusion please see the following notice:

Concrete sidewalks have been scheduled for your area however, work on Griffin and Hannum Streets are being done first. Once this work is completed, the sidewalk crew will come out to East Lake Road. There have been some delays in obtaining this new concrete team and for that, we apologize.

When the sidewalk crew comes to your home, rails will be installed in order to form the sidewalk. The concrete will be poured that day or the following day, weather dependent. Once the concrete is poured it cannot be walked on for 24 hours and it cannot be driven on for at least 72 hours.

It is our goal to send out another notification to you 24 hours in advance of the rails being installed. We appreciate your patience and cooperation with us as we continue to deliver the best product we can to the Village of Skaneateles.

If you have any questions regarding the work, please contact the Village Office or Miranda Robinson with the Village: 315.729.9484
