Skaneateles, NY 13152

FOR IMMEDIATE RELEASE

Town and Village of Skaneateles Launch Free App for the Community

The Town and Village of Skaneateles, in partnership, have launched a new app to communicate information to residents during an emergency. The new app, called MyLocalSafety, is free and all members of the community are encouraged to download the app.

Through the MyLocalSafety app (also known as MyLS), members of the community can upload information about their family, their home and their pets to a secure platform that will allow emergency responders to know important information before arriving on scene. Each user can decide what and how much information to upload.

The MyLocalSafety app will allow the Town and Village of Skaneateles to effectively communicate with the community about road closures, power outages, water main breaks and other valuable information in a way that can easily be updated and communicated right through the app.

The MyLocalSafety app is available for download for free from both the Apple App Store for Apple devices and the Google Play Store for Android devices. More information and links to download the app can be found at www.MyLocalSafety.com. After downloading the app, enter code number 787837 to add Skaneateles to your MyLocalSafety app.
